

## Repair of the water supply at the Senanga Orphan Day Care Centre

The pump was still in good condition but the borehole underneath had collapsed and so there was no water. That was the situation at the school of the SODC, Senanga Orphan Day Care Centre. More than 900 pupils and no water. That's an emergency and so an urgent appeal was made to Zambridge to assist. Luckily we were able to help because of a very generous extra contribution from some of our donors. These pictures showing the construction of the new borehole were received by the end of September 2016.

In the foreground the old borehole with the pump underneath a shelter.

Construction of the new borehole.

And then there was water again!
