

New tablets for Maxanaedi and SODC

Thanks to a very generous extra gift from one of our regular donors, the two schools being supported by the foundation Zambridge Senanga as from the beginning of 2021 each possess 7 so-called **ZEduPads**, 2 for the teachers and 5 for the pupils.

ZEduPads (ZEdu = Zambia Education) have been developed by *iSchool Zambia* and contain the complete Zambian primary school curriculum.

Apart from the multimedia lessons the tablet also contains Wikipedia, a Word processor and spreadsheet programme and other (child friendly) applications. On the teacher version there are about 5000 lesson plans, training modules for further professional development and other teacher-specific software.

The contents of the ZEduPads has been adapted for interactive e-learning and as such contributes to enhancing the

computer literacy of the students and their teachers.

The pictures show how a group of pupils from Maxanaedi School learn how to use ZEduPads for the first time. The pupils from SODC as well have embarked on this new way of learning. In this way once more big steps have been taken to the future.
