

SOLAR ENERGY FOR MAXANAEDI AND SODC

While towards the end of 2018 the school building of Maxanaedi was the first to receive an installation for collecting solar energy, in the beginning of 2019 the building of SODC also has been fitted with a similar installation. This project for the most part has been financed by *Our Energy Foundation* with a substantial donation of the foundation *Wilde Ganzen*. Zambridge Senanga has contributed 10% of the costs. All classrooms and working spaces of both schools now always have light in the evening so that all rooms can be used most efficiently.

Solar panels on the roof of **Maxanaedi Community School**.

On the left a class room with the new lights.

On the right the room with the inverters and the batteries for the storage of the generated electricity.

The solar panels at **SODC** with on the left a close-up and on the right a classroom and the battery pack.

The installation has been done by
