

At the beginning of September 2015 two new toilet blocks have come into use at the site of the Home Based Care (HBC). These so-called VIPs have been built by a local contractor with financial support of Zambridge. Next to the toilet blocks a handwashing station has been constructed.

Front and back of the VIP (ventilation improved pit latrine).

A double block for the ladies ...

... and a single one for the gents.

The handwashing station.

Official introduction of the facility and a picture of the information meeting on hygiene and toilet use.
